

AccessHub.AI

GAIN COMPLETE VISIBILITY INTO YOUR SAP BTP LANDSCAPE

— Complimentary 12-Month BTP Security Health Check

Crave InfoTech is providing AccessHub BTP Security Health Check complimentarily for 12 months—helping your organization identify security risks, gaps, and optimization opportunities across your SAP BTP landscape with comprehensive automated assessment.

WHY BTP SECURITY MATTERS NOW

- As BTP environments scale across subaccounts, security exposure grows rapidly
- Over 95% of BTP identities are non-human—API keys, service accounts, and credentials often lack lifecycle control
- Unmanaged keys, misconfigured access controls, and role sprawl create blind spots
- Traditional GRC tools don't cover cloud-native identities, leaving compliance gaps

WHAT YOU'LL DISCOVER

70+ SECURITY CHECKS

- Unmanaged API keys and service credentials creating exposure
- Weak or inconsistent access controls and authentication gaps
- Ownership and governance blind spots in role collections
- Compliance and audit readiness risks across subaccounts

How the Health Check Works

01 Discover & Assess

Comprehensive automated assessment across your BTP environment Auth, Authorization, APIs, and Configuration checks 70+ security checks performed

02 Analyze & Classify

Risk classification: Compliant, Non-Compliant, Manual Review Identifies key risk areas and security gaps Prioritized findings based on security impact

03 Report & Guide

- Actionable remediation guidance
- Compliance mapping for audit readiness
- Foundation for continuous governance

WHAT YOU RECEIVE

- Real-time BTP security posture visibility
- Identification of unmanaged credentials and access risks
- Clear risk classification and prioritization
- Actionable remediation recommendations
- Compliance mapping and audit readiness insights
- Foundation for automation and governance initiatives

WHAT HAPPENS AFTER?

Security posture is not static—it evolves as your BTP environment scales, identities multiply, and access configurations change. Accesshub.AI's BTP security Health Check gives your team structured visibility. You gain continuous security insights, identify emerging risks as your landscape grows, and establish clear priorities for governance improvement. This foundation helps you plan and implement sustainable access control and identity management practices.
