

AutoContractAI- Next-gen agreement assessment with AI

By Crave InfoTech

Automate contract management with Crave InfoTech's Generative AI-powered solution. Ensure accurate data extraction, compliance validation, seamless version control, and structured outputs for enhanced efficiency. Eliminate manual errors, streamline workflows, and scale effortlessly across complex, multi-format contract documents.

- Process contracts with AI for accurate, structured outputs.
- Handle high volumes efficiently with minimal effort.
- Ensure compliance with legal and business rules.
- Track and manage document changes automatically.
- Enable quick retrieval of contracts and related data.

High-Level Architecture Diagram

Customer Challenges

- Dense legal language and varied formats hinder automation.
- Manual processing of high volumes is inefficient.
- Robust validation needed for compliance with rules.
- Tracking amendments challenges accuracy and traceability.
- Quick access to related contracts boosts efficiency.

Solution – Contract Management Automation

- Automate document management and analysis using SAP Gen-AI and SAP HANA for efficient contract processing.
- Accurate extraction of critical information through predefined questions and semantic analysis.
- Robust compliance validation & data accuracy with rule-based and LLM-based verification.
- Enhanced user experience and streamlined workflow version control with metadata extraction, and chatbot interaction.

Overall Benefits

- Automates repetitive document processing tasks, reducing manual effort and improving accuracy.
- Speeds up compliance validation with rule-based and AI-driven mechanisms, ensuring regulatory adherence.
- Enhances user productivity with intuitive chatbot interaction and streamlined feedback.
- Improves operational efficiency through advanced document search and retrieval capabilities.
- Ensures data security with version control and metadata enrichment for audit-ready records.
- Reduces processing time for lengthy contracts, enabling faster decision-making and execution.
- Simplifies report generation with structured outputs and customizable templates.
- Supports scalability with seamless integration into SAP and third-party systems.
