

Crave's CoreAssess.AI Application is the right Tool for Unbiased, Consistent & Rapid AI Powered Assessment, recommendations, quantification of efforts and ROI calculation.

Crave's CoreAssess.AI is a Clean Core Analysis application that leverages the power of Generative AI (Gen AI) & BTP through trained LLMs, RAG & Tribal SAP expertise to revolutionize object analysis, delivering deep insights with speed and accuracy.

- **Faster Analysis and Decision-Making** : Reduces analysis time from weeks to minutes, enabling quicker project execution and transformation planning.
- **Holistic Insights** : Combines technical and functional perspectives, unlike traditional tools.
- **Proactive Recommendations** : Aligns with SAP's clean core strategy for long-term success.
- **Improved Modernization Planning** : Provides clear, actionable recommendations for on-stack and side-by-side approaches, supported by BTP service estimations and implementation efforts.

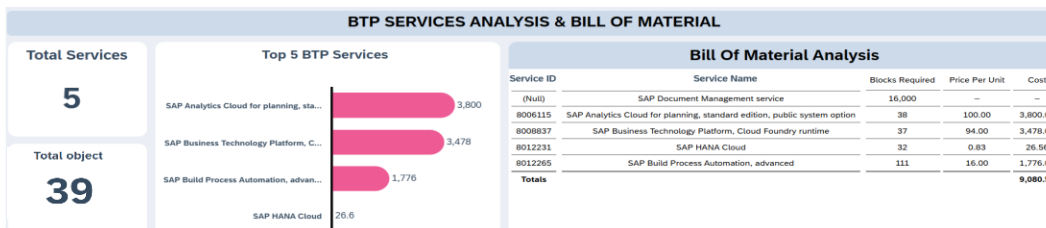

SUMMARY

ON-STACK ANALYSIS

SIDE-BY-SIDE ANALYSIS

Customer Challenges

- Time intensive & error-prone manual process which is Difficult to scale for large volumes of ABAP objects.
- Limited ability to perform comprehensive & multi-dimensional analysis.
- High cost activity involving many man hours due to manual review and analysis.

Solution – CoreAssess.AI

- CoreAssess.AI provides the power to automate complex analysis of custom objects quickly.
- Our tool provides detailed analysis & recommendations highlighting what stays in the core & what goes outside.
- CoreAssess.AI will benefit multiple personals like system architects, development teams and leadership teams to quantify efforts and evaluate technical debts.
- Get detailed SQL analysis & guidance on code modernization for within & outside S/4HANA.
- The tool will generate a BTP services BOM for SAP sales team to build in RISE deals. (FOR SAP).
- The tool will recommend implementation, estimation for on-stack and side-by-side modernization along with BTP services BOM for side-by-side extensions allowing customers to develop clean core roadmap.

Overall Benefits

- Quick and accurate analysis of the most complex custom ABAP projects with recommendations.
- This tool will help customers to plan their clean core journey from ECC to S/4 and continuous improvement post S/4 migration.
- Get necessary information for all stakeholders to make informed decision.
- Validated BTP BOM based on affirmed use cases resulting in effective adoption post sales.
- A complete guide for On-stack modernization with detailed GenAI driven clean core assessment.
- Unbiased GenAI-powered assessments lead to increased transparency and trust between multiple stakeholders.
