

Elevate access governance across SAP and non-SAP applications to achieve unmatched security, streamlined compliance, and operational excellence.

- Extensive library of connectors: Pre-build connectors for critical applications based on open standards like SCIM and REST APIs for broad compatibility.
- Automated Compliant User Provisioning and De-Provisioning: Secure, compliant user lifecycle management with real-time risk checks.
- Elevated Access Management: Time-bound, risk-aware control of privileged access across critical non-SAP applications.
- User Access Reviews: Automated, audit-ready enterprise-wide access reviews with smart recommendations.

Customer Challenges

- **Fragmented Governance Across Systems** : Difficulty in unifying governance for both SAP and third-party applications like Salesforce, Oracle, and Workday.
- **Limited Visibility into Cross-System Risks** : Difficulty detecting and remediating Segregation of Duties (SOD) conflicts and access risks across interconnected systems.
- **Siloed Processes for Provisioning and Role Management**: Reliance on manual provisioning, de-provisioning, and role changes, leading to increased errors and delays.

Solution – AccessHub

- Extend SAP Access Control or SAP Identity Access Governance to other critical applications like Workday, Salesforce, Oracle, and ServiceNow
- Advanced integration framework and pre-built connectors for seamless enterprise-wide connectivity and compliance.
- Comprehensive risk analysis coupled with AI-driven insights for holistic risk management.
- Scalable automation frameworks that reduce complexity, streamline operations, and enhance compliance across hybrid IT environments.

Overall Benefits

- Establish comprehensive security controls around identities across SAP and other critical business applications.
- Enhance enterprise-wide audit preparedness for regulations like SOX
- Detect and remediate cross system access risk using AI-driven insights
- Streamline automation for compliant identity lifecycle management, reducing manual interventions and human error.
- Achieve Rapid Time-to-Value and Operational Efficiency
- Maximize the value and consumption of GRC solutions & BTP Services.
- Elevate the value of the Business Suite in the Cloud by delivering robust, enterprise-wide security solution.
- Establish SAP GRC as the definitive source for identifying, managing, and mitigating access risks.
