

IntegrateHub - Migration, Modernization & Consolidation

IntegrateHub by Crave InfoTech accelerates SAP PI/PO and non-SAP middleware to SAP Integration Suite migration faster and with less risk. The tool reduces migration effort by 30–50% and minimizes manual work, errors, and disruption by using proprietary tools, automation-driven assessment, and conversion.

Our four-step process, aligned with SAP's migration factory approach, begins with a free assessment to define scope and build a tailored plan. This is followed by a structured execution phase covering detailed analysis, automated conversion, testing, and full migration — delivered with speed, security, and minimal business impact.

IntegrateHub

Crave Accelerators

IntegrateHub's accelerators complement SAP migratory factory tools for better Assessment, Migration, Modernization and Platform Consolidation for SAP PO and other enterprise integration tools.

Significant investment in accelerators for TIBCO, MQ, Biztalk, Web sphere, Web method, Sterling, Boomi and MuleSoft – SAP cannot create these accelerators for legal reasons.

SAP TO SAP	NON-SAP TO SAP
➤ ABAP Objects Assessment – API and Events ➤ Java Mappings Assessment & Migration ➤ UDF & Adapter Modules Migration (In Development) ➤ Auto-Generation of post implementation documentation	➤ Migration from Other Middleware to SAP ➤ Boomi Migration Tool ➤ Additional Middleware Support
